Skills

Programming Languages: HTML, CSS, Javascript, NodeJS, Python, C++ | **Frameworks:** ReactJS, ExpressJS | **Database:** MongoDB
Miscellaneous: Git, Github, Redux, Webpack, Socket.io, Jest, Mapbox, Material UI, NumPy, Fly.io, Netlify, Google Cloud, Linux

Projects

Interactive Data Visualization Map

JavaScript, HTML, CSS, Mapbox GL, Mapbox Studio

[View Live](#) | [View Code](#)

- Developed an interactive map showcasing conflict zones and energy pipelines worldwide, revealing crucial geopolitical insights.
- Added rich interactivity, allowing users to zoom in, pan, tilt, navigate, and click to access detailed information about map data.
- Designed the app in a flexible manner, allowing easy insertion of additional data to the map for further contribution.
- **Utilized by an online institution** to teach international policies to its students

NoseBook

ReactJS, ExpressJS, NodeJS, MongoDB, Socket.io, PassportJS, Material UI, Google Cloud, Cloudinary

[View Live](#) | [View Code](#)

- Developed a full-stack **Facebook and Messenger clone**, featuring all the core functionalities including posts, comments, likes, friend requests, real-time notifications, real-time messaging, and a wide range of other features.
- Created **two backend servers**—one for handling API requests and the other for handling Socket.io events.
- Implemented a basic username/password-based authentication and **Google authentication** system using PassportJS, BcryptJS, JWT, and Google Cloud Platform.
- Utilized Socket.io to store users' locations within the app, allowing a proper real-time notification system for new messages (e.g. a user receives real-time notifications for new messages only when the user is NOT on the messenger page).
- Added a **continuous typing indicator** for real-time chatting that **functions better than that of Skype and Telegram**.
- Utilized full-text search index of MongoDB, allowing users to search for other users' accounts.
- Employed Cloudinary for storing images (post images, profile pictures, and cover pictures).
- Hosted the main API server on Google Cloud's App Engine Application Platform.

Blog App

ReactJS, ExpressJS, NodeJS, MongoDB, TinyMCE, PassportJS

[View Live](#) | [View Code](#)

- Developed a full-stack personal blog for posting stories and allowing other users to like and comment on them.
- Integrated advanced text editor features with **TinyMCE**, allowing the addition of images, tables, and iframes.
- Implemented a **RESTful** API using ExpressJS for smooth CRUD operations from the client interface.
- Followed **MVC** architectural pattern, ensuring a flexible and maintainable codebase.

Portfolio

ReactJS, EmailJS

[View Live](#) | [View Code](#)

- Built a **fully responsive** portfolio website for myself.
- Utilized JavaScript intersection observer to animate components upon scrolling.

Work Experience

Code In Place, Stanford University

2023 Mar - 2023 Apr

Section Leader, Mentor

Remote

- Worked within a **large teaching team** to ensure the effective delivery of the curriculum **teaching the fundamentals of programming** to nearly **500 students**.
- **Led a specific section** comprising a diverse **group of 10 students**, providing personalized guidance and mentorship throughout their journey.

Education

B.S. Chemical Engineering

2017 Apr - 2021 Aug

Shahjalal University of Science and Technology

Sylhet, Bangladesh

- **Relevant Online Courses:** Data Structures and Algorithms, Systems Programming, Probability for Computer Scientists.
- **Languages:** Bangla (Native), English (Second Language | SAT: 1490/1600), Hindi (Conversational)
